

# TOP 10 TECH GADGETS of the 21st Century

## TOMORROW'S TOP TEN LIST – TODAY!

2013 was another great year for gadgets as technology continues to shape and enhance (most of the time) our lives. But at Binary Pulse, we think the best stuff's yet to come. Here's a little forward-looking retrospective on what the rest of the century might hold in store.

2014

### Google™ Glass

#### WEARABLE COMPUTER

The future is now with *Google Glass*, the computer you wear on your face. Use voice navigation to enjoy a whole new world of multi-tasking: Read a blog while you play the violin! Build a presentation on a trampoline! With *Google Glass*, there's no need to give anyone, or anything, your complete attention ever again.

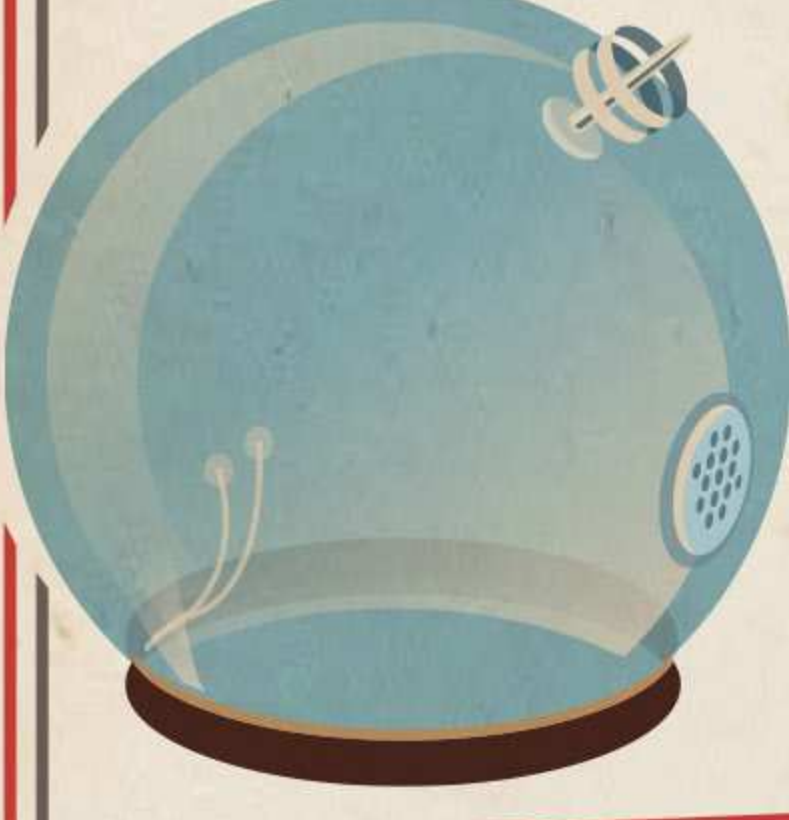

9 out of 10 tech nerds believe that *Google Glass* makes them look hip and urbane.

2019

### HeadBags™

#### PERSONAL AIRBAG SYSTEM

Never look up from your device again! *HeadBags* instantly inflate as you walk, head down, poking at your screen. Thrill as you careen into, then bounce away from, objects and people – eliminating any need to make eye contact with bothersome "others."

2019

8 out of 10

users report that their devices are nicer to them than other humans.

2022

### Perfect Matchbot™

#### DRONE COMPANION

Shut-in? Afraid of people? Irradiated? Then you need *Perfect Matchbot*, your hassle-free companion. Unlike a carbon-based friend, lover, or pet, *Perfect Matchbot* will never demand that you rub its belly or suffer through rambling anecdotes about people you've never met.

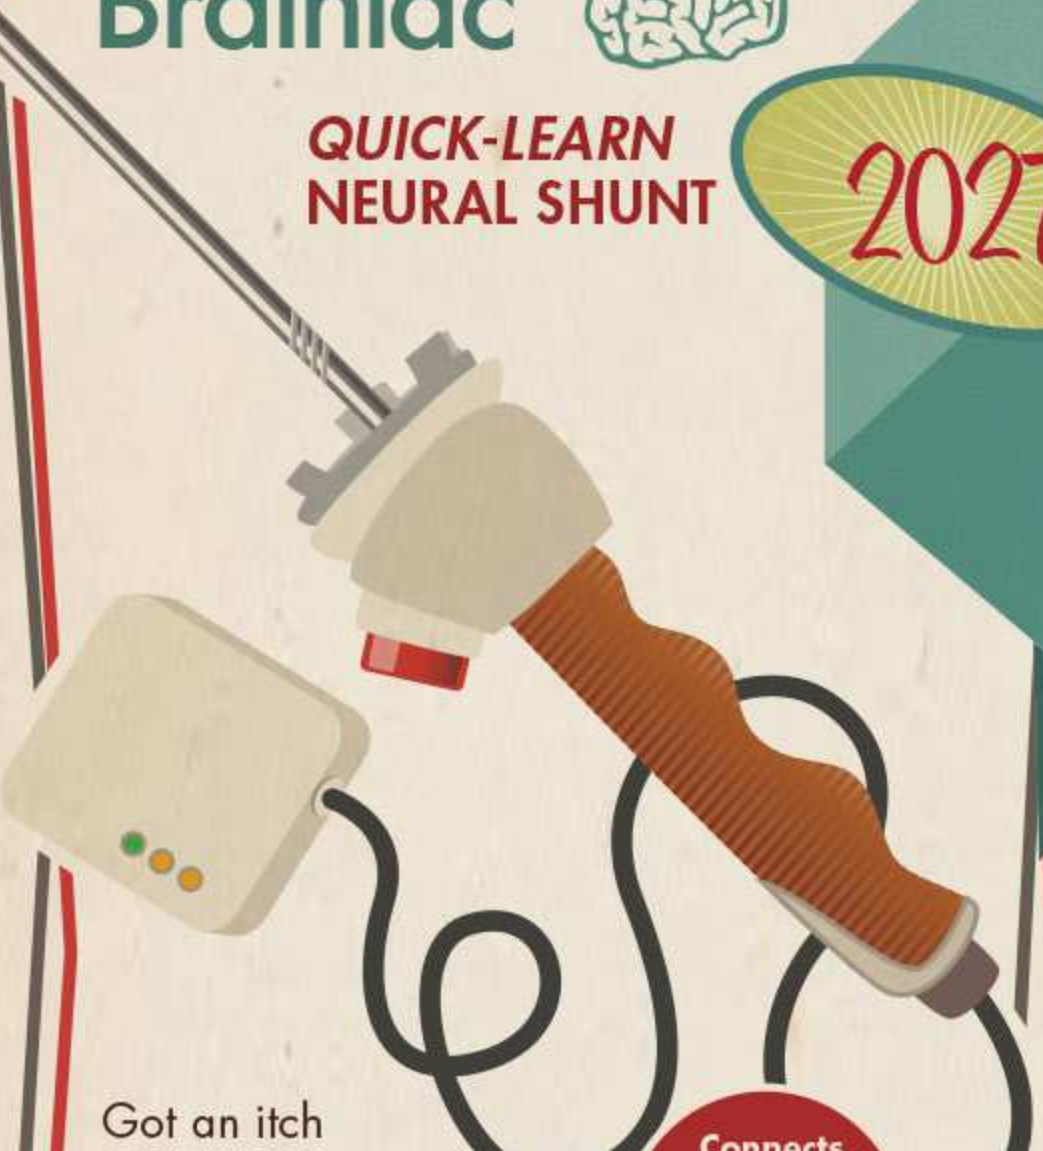

70% of *Perfect Matchbot* users report that their personal drone is "just as funny" as popular TV crypto-host Jeff Foxworthy.

2027

### Brainiac™

#### QUICK-LEARN NEURAL SHUNT

Got an itch to know more about quantum physics? Or maybe you'd like to learn a dead language, like Latin or French? Learn anything in minutes with the *Brainiac Quick-Learn Neural Shunt*.

Connects easily to the Nike Skullport™ on the back of your head.

3 out of 5 adults surveyed believe themselves to be "way smarter than people give me credit for."

2043

### D-TOX™

#### DE-DRUNKINATOR

Had a little (or a lot) too much to drink and need to drive home, give a presentation at your holo-office or testify before the Council of Elders? Undrunk Yourself™ first with *D-Tox*.

7% of users said they "weren't sure" if they were intoxicated right at this very moment.

2051

### Narcissa™

#### ANTI-AGING NANOCREAM

Did You Know? 2 out of 10 users surveyed believe there really is a fountain of youth, and that it's in Duluth.

Microscopic robots stab at dead layers of skin, prompting collagen renewal and leaving you feeling fresh and youthful all day! *Narcissa* has been thoroughly tested and proven to be safe (except for one unfortunate incident involving an elderly Spice Girl clone).

2067

### Mr. Moody™

#### REBREATHER

Have you lost That Positive Feeling™? *Mister Moody* to the rescue! Just breathe in deeply, hold and release. Enhancing your mood can be a real gas!

4 out of 7 surveyed adults rate themselves as "more or less happy, but would prefer to live in an eternal state of euphoria, if you've got extra."

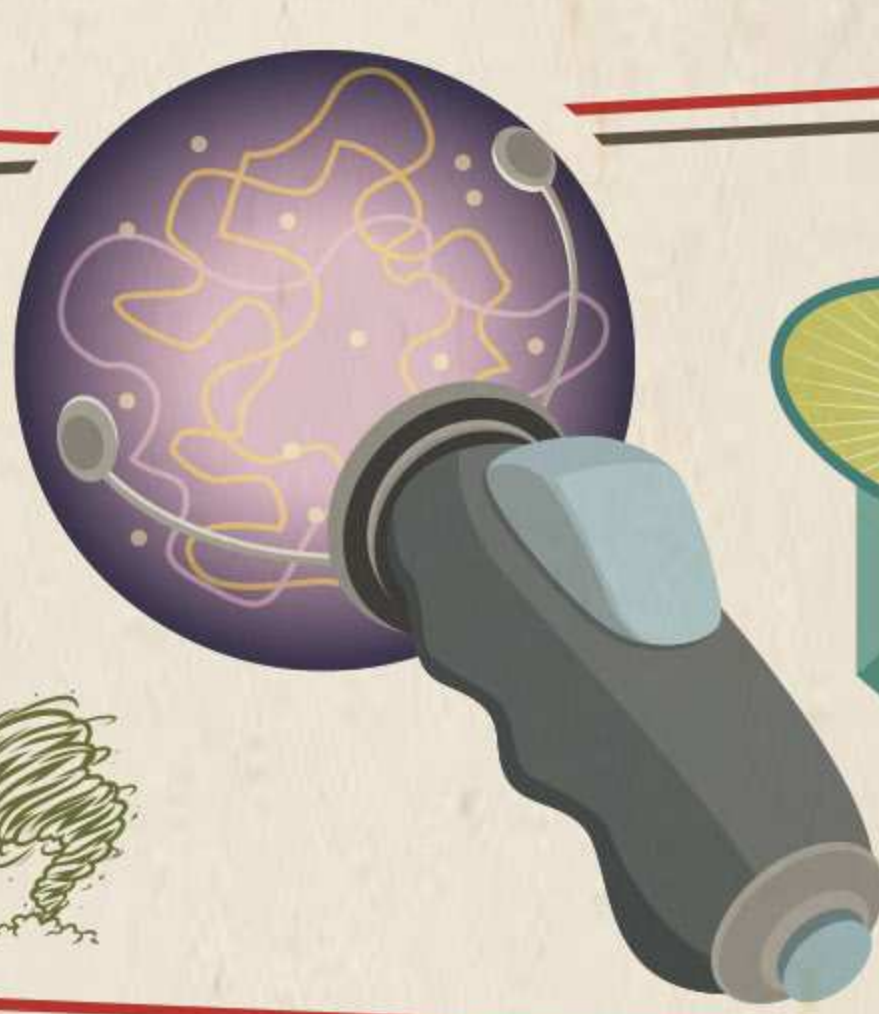

2075

### QuickBubble™

#### PERSONAL ATMOSPHERE

Mood not matching the weather outside? Create your own atmosphere with *QuickBubble*. Enjoy your own private rainfall, snowstorm, or sunny day! Hey grumpy, better whip up a mini-thundercloud to follow you around!

45% of users rated themselves as "very interested" in experiencing a personal tornado.

2082

### Redux™

#### POCKET TIME MACHINE

Said something you wish you could take back? Don't want that scarf or romantic partner that looked so good in the store? Enjoy do-overs anywhere, with *Redux* time travel on-the-go.

8%

of attempts to be witty in front of your boss will result in an inappropriate statement.

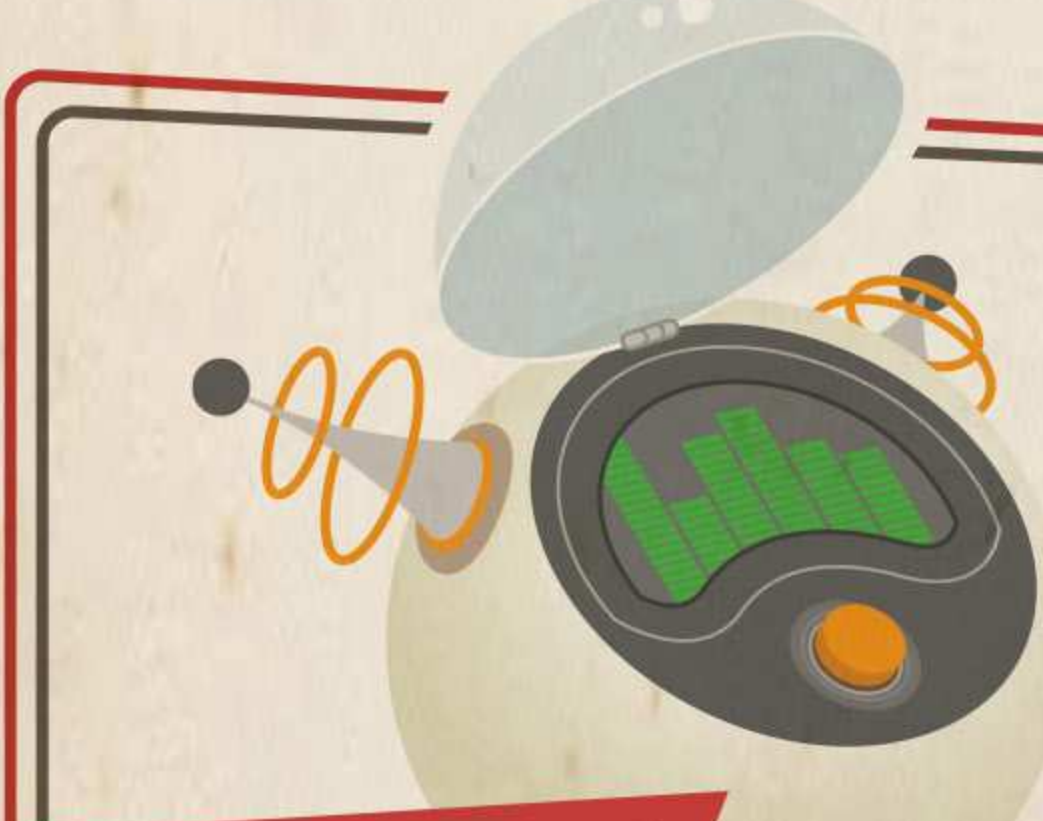

2099

### DenseDot™

#### PORTABLE BLACK HOLE GENERATOR

Sure, black holes are fun – but what a hassle! Now, thanks to *DenseDot*, you can carry your black hole generator wherever you go! So whether it's a garage full of inter-dimensional paint cans or that pile of clothes you're too lazy to give to the needy, use *DenseDot* to make it go away forever!\*

\*Not for use on mothers-in-law.

The average black hole is comprised of 36% unpaired socks.

At Binary Pulse, we think the future of technology can be pretty cool... whatever it looks like.
